WOOL PRESS Scale Upgrade & Replacement Kits

All makes and models:

STEVLYON

TPW

The MACBro digital scale upgrade kit was developed to replace, or upgrade, existing wool press scales. They can also be used as a budget new scale for machines that have no scales fitted from new.

The monitor has a large backlit LCD screen which is easily read at a glance. The Zero-Tare feature makes the scales easy to "Zero" while the Zero-Tracking ability enables the scale to compensate for floor movements etc, and track to Zero.

The Kit come with all necessary parts to fit up to your wool press, including Monitor, Load cell, Power supply, fitting brackets and instructions.

- Solid state sender (no moving parts)
- 1000kg safe load capacity
- Mounting plate included
- Rigid and robust design
- Large diameter foot for stability
- Heavy duty coaxial lead and plug
- Easily replaces clock face scale systems
- AC power adaptor and battery back - optional
